NOTICE OF ALLOWANCE

Allowable Subject Matter

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As the closest reference, Honda et al. (US 2004/0184193; hereinafter Honda) discloses a head support device of self-balancing type (Fig.1-5, for example) arranged to be used with a recording medium the head support device being operable to support a head accessing the recording medium the head support device comprising:

a head support arm 2 having a center line and a rotation axis about which said head support arm is rotatable in a radial direction of the recording medium, said head support device being rotatable in a direction perpendicular to the recording medium about a line substantially perpendicular to the rotation axis and the center line, the head support arm including

an arm having one end and another end, the arm having a tab at the one end thereof and having a hole formed therein at the another end thereof, the arm further having pivots 11a/11b positioning the hole between the pivots, and

a spring, the end of the spring being connected with the arm;

a bearing 10 including a flange at one end thereof, a thread portion formed at another end thereof, and a cylinder portion provided between the flange and the thread portion;

a head slider 1 provided at the one end of the arm, the head slider being arranged to have said head fixed thereto via a gimbal mechanism 13;

Art Unit: 2627

a voice coil holder 8 fixed to the head support arm, the voice coil holder having a voice coil 3 provided at the voice coil holder, the voice coil rotating the head support arm in the radial direction of the recording medium about the rotation axis;

a reinforcing plate 5;

a nut 6 fitting the thread portion,

wherein the head support arm is supported rotatably about a line provided between contact points at which the pivots contact the flange and in a direction perpendicular to the recording medium, and

wherein the spring as an elastic member generates an urging force toward the recording medium (fig.5).

However, Honda fails to show “*the spring having a cramp and an elastic force generator portion provided at an end of the spring, the end of the spring being connected with the arm*”; “*the reinforcing plate having a shape substantially identical to a shape of the cramp, the reinforcing plate being fixed to a predetermined position of the cramp at a side opposite to a projecting direction of the pivots*”; “*a collar fitting the cylinder portion and contacting the reinforcing plate*”; “*wherein the flange and the nut sandwich and cramp the head support arm having the reinforcing plate fixed thereto*”; or that “*the spring is provided unitarily with the head support arm*” as set forth in the independent claims 1 and 12.

These features, in combination with the other features of the claims, are not anticipated by, nor made obvious over, the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2627

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
